

INTERNATIONAL

## KEEPING THE LEGEND ALIVE

**We're delighted to be starting a regular column in the Healey Club magazine and look forward to bringing you all the latest news from UK-based Cape International, home of the Big Healeys.**

Some of you know us well already. We've been regular advertisers for some time which has led to some interesting conversations – and useful business – with Swedish owners. As we speak, we are in the last stages of a ground-up restoration for a Swedish guy residing in Monaco. We've taken his early BN4 and turned it into a CapeSport 3000 with a difference. It's been specifically designed to ensure our customer is a real contender in the hill climb events planned for the 2007 season in Monte Carlo.

As you can see .....here are all the parts laid out ready for installation (Steve – can you insert the technical stuff which describes what we can see in the pic).

A number of our latest restoration projects are now on-line at:  
[www.cape-international.com](http://www.cape-international.com)

We're very proud of our restoration work and know we're the best in the business – now customers can see this for themselves. If you like what we're doing drop us a line – who knows it could be your car we feature next time!

And if all this wasn't enough we have loads more planned.....

Our CapeSport 100 is almost complete and a leading magazine has waited patiently for the exclusive feature and afterwards it will be offered for sale.

Our stocks also include three unique restoration projects which are featured in the 'Cars for Sale' section on our website.

The restoration of chassis number AHX11 is progressing well and this historical vehicle is worthy of regular updates which will feature in the next few weeks.

If you want to discuss your car's restoration or upgrade, get in touch.

Cheers

**Steve Norton**

**Cape International is the best in the business world-wide for classic parts, accessories, servicing and restoration for all the big Austin Healey models including the 100, 100S, 100/6 and 3000. Based near Coventry, UK, we are the world's number one specialist for friendly service and knowledgeable advice.**
